REFERENCE LETTERS

To whom it may concern:

16 December 2022

Letter of Reference

It's my pleasure to write recommendation letter for Mr Demetrius Lacet Silva. For the past 2 years, our company has been working with INESCTEC in a partnership on EU funded research project called Life Skills for Employment in COVID-19 Era through VR Innovation (Life Skills VR)" in which Mr Silva had the role of the researcher/developer/manager on behalf of our Portuguese partner INESCTEC.

My name is Dr Lakhvir Singh, and I am a Managing Director at Centre for Factories of the Future Ltd and Life Skills VR project coordinator. After working in IT industry for over 12 years, I have collaborated with a variety of researchers/project managers, including Mr Demetrius Lacet Silva. Mr Silva applied sketching, graphic designing, VR game art using Suite Adobe and unity 3D. Mr Silva is one of the most effective researcher/developer/project managers I've worked with over the last 12 years.

Mr Silva is very dedicated to his work and very punctual with his project partners, which helps us finish all project activities on time and at highest level of quality.

I'm confident that Mr Silva would be a great fit for your organisation. If you'd like more information, I'd be happy to expand on my experience working with Mr Silva. Please feel free to contact me at Lakhvir.singh@c4ff.co.uk.

Sincerely,

Centre for Factories of the Future

Letter of Reference

We have begun the cooperation with Demetrius Lacet Silva on the "Life Skills for Employment in COVID-19 Era through VR Innovation" Erasmus+ project. In it he had the role of the manager on behalf of our Portuguese partner INESC TEC. During his involvement he was an integral member of the international team who developed & implemented the Virtual Reality environment and its scenarios.

We were impressed by Demetrius Lacet Silva's practical knowledge and extensive experience in the field of Virtual Reality development & delivery. He is enthusiastic, with a sound academic background. Also he is very creative, eager to help and work and his deliverables are of excellent quality. I believe that he will make an excellent employee in an organization working both at national and at international environment.

His professionalism and commitment makes Demetrius Lacet Silva a trusted partner to implement projects with.

Sincerely

TO WHOM IT MAY CONCERN

I have known Mr Demetrius Lacet Silva for the last year during his very active participation in the LifeSkillsVR Erasmus+ Project as part of the Inesc Tec Team. Mr Silva has shown, throughout the whole project, his command of design and its application within the virtual reality technology domain. His organisational and technical skills are surely second to none. In this past year, even though our interactions were mainly through remote communication, coupled with a few in-person meeting, I have come to appreciate the dedication to detail applied and Demetrius's insight into the project's needs.

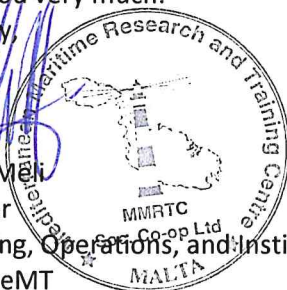

My personal profile of Mr. Demetrius Lacet Silva is of an eager perennial student who does not shy away from doing what is requested of him. He is very well researched and informed, and his interventions are always very well weighed and studied, making him a key member of any team that is geared towards delivering successful outcomes.

I have no doubt at all that Demetrius will bring value to any team. I recommend him with no reservations, and I genuinely hope that I get to work with him on many more projects in the future.

Thank you very much.

Sincerely,

Joseph Meli

Regards: Researcher

To whom it may concern,

Mr Demetrius Lacet has had many years of experience in the intersection of virtual reality and cultural heritage, I came across his work over ten years ago and invited him to Perth Australia on a visiting fellowship in 2014 and he gave a very well-received talk here at our VR lab.

I was impressed with his wide range of skills across computing, engineering, art and interaction design. There are few people I know of who are responsive to both aesthetic and technical challenges. I later invited him to be a co-author on a paper:

Champion, E., Qiang, L., Lacet, D. and Dekker, A. (2016). 3D in-world Telepresence with Camera-Tracked Gestural Interaction. *14th EUROGRAPHICS Workshop on Graphics and Cultural Heritage*, 5-7 October 2016, Genoa, Italy, pp. 119-122. Short paper. URL: <http://gch2016.ge.imati.cnr.it/> OR <https://diglib.eg.org/handle/10.2312/gch20161394>

Mr Lacet is highly enthusiastic about VR, interactive television and serious game design, he is a highly imaginative yet also dedicated researcher, and popular, committed, teacher. I am sure he would make an excellent PhD student and researcher.

In short, he is one of the most capable younger researchers in the field that I know of and I consider him to be an excellent colleague in the field of digital cultural heritage, game studies and VR. I cannot recommend his work or his character highly enough.

Yours sincerely,

Professor Erik Champion

Regards: Researcher

To whom it may concern,

Mr Demetrius Lacet is a brilliant and capable researcher and media artist in virtual reality. I have followed his work for years and am impressed with the creativity he has brought to his projects, especially the way he has engaged his students and members of the public in the process. Most of his work is in the area of Cultural Heritage, and he has made a fine contribution, there.

I recommend him highly for the open position at your school.

Sincerely,

A handwritten signature in black ink that reads "Jeffrey Jacobson". The signature is written in a cursive style with a long horizontal line extending to the right.
